

## **Status Report**

### **07-08-10**

699 U.S. Fish and Wildlife personnel are actively engaged in response to the Deepwater Horizon/BP Oil Spill.

Aerial operations in Louisiana observed oil in Biloxi Marsh. High seas are washing oil and boom into the marshes in many areas.

Thirty-two Brown Pelicans were successfully released at Fort Desoto County Park in St. Petersburg, FL. The site was selected to avoid an anticipated tropical weather system expected in Texas.

Test results from oil found at McFaddin National Wildlife Refuge in Texas are confirmed to be from Deepwater Horizon/BP Oil Spill. Tar balls have been found on Bolivar Peninsula and Galveston Island, TX.

Field surveys are expected to be suspended due to severe weather and rising tides from Tropical Storm Bonnie.

### **By the Numbers**

#### **Personnel Involved**

Overall personnel responding: more than 45,400

#### **Response Vessels**

Total vessels responding: more than 6,200

#### **Boom Data**

Total boom deployed: approximately 1,602 miles

Boom available: more than 600 miles

#### **Oil recovered**

Oily water recovered: more than 28.6 million gallons

Amount estimated burned: approximately 10 million gallons

Oil captured over last 24 hours: more than 1.03 million gallons

#### **Dispersant**

Surface dispersant used: 1.07 million gallons

Subsea dispersant used: more than 657,000 gallons

Total dispersant used: approximately 1.72 million gallons

#### **Shoreline Impacted**

Shoreline impacted over last 24 hours: approximately 507 miles of Gulf Coast shoreline is currently oiled—approximately 290 miles in Louisiana, 69 miles in Mississippi, 62 miles in Alabama, and 86 miles in Florida.
